Daniel Alejandro Gilman

Contact Information	Dept. of Astronomy and Astrophysics University of Toronto 50 St George St Toronto, ON M5S 3H4	*phone:* +1-437-999-5869 *E-mail:* gilman@astro.utoronto.ca *web:* www.astro.utoronto.ca/ gilman *ORCID ID:* 0000-0002-5116-7287

Research Dark matter, strong gravitational lensing, galactic dynamics

Positions Held

Postdoctoral Researcher (2020-present)
University of Toronto
Supervisor: Jo Bovy

Graduate Student Researcher (2016-2020)
University of California, Los Angeles
Supervisor: Tommaso Treu

NASA Undergraduate Research Program (2013, 2014)
NASA Jet Propulsion Laboratory
Supervisors: Leonidas Moustakas, Francis-Yan Cyr-Racine

Education

Ph.D. Astrophysics (2020)
University of California, Los Angeles
Advisor: Tommaso Treu
Dissertation: *Investigating the Nature of Dark Matter with Strong Gravitational Lensing*

M.S. Physics (2015)
University of California, Los Angeles

B.S. Physics (2014), *cum laude*
James Madison University

Awards and Honors

Co-investigator JWST GO-2046, *A definitive test of the dark matter paradigm* (PI Anna Nierenberg)

CGS/ProQuest Distinguished Dissertation Award in Physical Sciences, UCLA's single nominee, honorable mention nationwide in USA (2021)

Allocation on the Niagara computing cluster (University of Toronto); 630 core years (2021)

Outstanding Undergraduate Research Award, James Madison University, (2014)

Phi Beta Kappa, James Madison University (2014)

Publication Statistics

total publications: 27
9 first author, 4 second author or significant contribution

First author / major contribution

Veronica Dike, **Daniel Gilman**, Tommaso Treu, Strong lensing constraints on primordial black holes as a dark matter candidate, arXiv:2210.09493, submitted to MNRAS (2022)

Daniel Gilman, Yi-Ming Zhong, Jo Bovy, Constraining resonant dark matter self-interactions with strong gravitational lenses, arXiv:2207.13111, submitted to Phys. Rev. D (2022)

Alex Laroche, **Daniel Gilman**, Xinyu Li, Jo Bovy, Xiaolong Du, Quantum fluctuations masquerade as halos: Bounds on ultra-light dark matter from quadruply-imaged quasars, MNRAS 517, 1867-1883 (2022)

Daniel Gilman, Andrew Benson, Jo Bovy, Simon Birrer, Tommaso Treu, Anna Nierenberg, The primordial matter power spectrum on sub-galactic scales, MNRAS 512, 3163-3188 (2022)

Daniel Gilman, Jo Bovy, Tommaso Treu, Anna Nierenberg, Simon Birrer, Andrew Benson, Omid Sameie, Strong lensing signatures of self-interacting dark matter in low-mass halos, MNRAS 507, 2432-2447 (2021)

Ethan Nadler. Simon Birrer, **Daniel Gilman**, Risa Wechsler, Xiaolong Du, Andrew Benson, Anna Nierenberg, Tommaso Treu, Dark Matter Constraints from a Unified Analysis of Strong Gravitational Lenses and Milky Way Satellite Galaxies, ApJ 917, 7 (2021)

Daniel Gilman, Simon Birrer, Tommaso Treu, TDCOSMO III: Dark matter substructure meets dark energy - the effects of (sub)halos on strong-lensing measurements of H_0, Astronomy & Astrophysics 642, A194 (2020)

Daniel Gilman, Xiaolong Du, Andrew Benson, Simon Birrer, Anna Nierenberg, Tommaso Treu, Constraints on the mass-concentration relation of cold dark matter halos with 11 strong gravitational lenses, MNRAS 492, L12-L16 (2020)

Daniel Gilman, Simon Birrer, Anna Nierenberg, Tommaso Treu, Xiaolong Du, Andrew Benson, Warm dark matter chills out: constraints on the halo mass function and the free-streaming length of dark matter with 8 quadruple-image strong gravitational lenses, MNRAS 491, 6077-6101 (2020)

Anna Nierenberg, **Daniel Gilman**, Tommaso Treu, Gabriel Brammer, Simon Birrer, Leonidas Moustakas, Adriano Agnello, Timo Anguita, Chris Fassnacht, Veronica Motta, Annika Peter, Dominique Sluse, Double dark matter vision: twice the number of compact-source lenses with narrow-line lensing and the WFC3 Grism, MNRAS 492, 5314-5335 (2020)

Daniel Gilman, Simon Birrer, Tommaso Treu, Anna Nierenberg, and Andrew Benson, Probing dark matter structure down to 10^7 solar masses: flux ratio statistics in gravitational lenses with line of sight halos, MNRAS 487, 5721-5738 (2019)

Daniel Gilman, Simon Birrer, Tommaso Treu, Charles R. Keeton, Anna Nierenberg, Probing the nature of dark matter by forward modelling flux ratios in strong gravitational lenses, MNRAS 481, 819-834 (2018)

Daniel Gilman, Adriano Agnello, Tommaso Treu, Charles R. Keeton, Anna Nierenberg, Strong lensing signatures of luminous structure and substructure in early-type galaxies, MNRAS 467, 3970-3992 (2017)

Selected Conference and Seminar Talks

Astronomy Lunch Seminar, Kavli IPMU, Tokyo, Japan; October 2022 (invited)
Vulcano Astrophysics and Particle Physics Workshop, Elba Island, Italy; September 2022 (invited)
Astrophysics seminar at Universite Libre de Bruxelles, Brussels, Belgium; September 2022 (invited)
Syncretism 2022, Particle physicists dining with astrophysicists, Chania, Greece; June 2022 (invited)
Astrophysics Colloquium, University of New Mexico, February 2022 (invited)
Kavli Institute for Cosmological Physics Seminar, University of Chicago; January 2022 (invited)
Sixteenth Marcell Grossman Meeting; July 2021
Astronomy and Astrophysics Colloquium, University of Toronto; January 2021 (invited)
Time Domain Cosmology with Strong Gravitational Lensing; Tokyo, Japan; January 2021
CoSyne: Cosmological Synergies in the Upcoming Decade; Paris, France; December 2019
Institute of Astronomy Lunch Seminar at the University of Cambridge, Cambridge, UK; September 2019
Matera Oscura: Cosmology and Dark Matter Within Galaxies and Clusters; Matera, Italy; September 2019
LSST Dark Matter Workshop, Chicago, USA; August 2019

Carnegie Observatories Astrophysics Seminar, Pasadena, USA; May 2019

TMT Science Forum, Pasadena USA; December 2018

The Universe as a Telescope: probing the cosmos at all scales with strong lensing, Milan, Italy; September 2018

Identification of Dark Matter, Providence, USA; July 2018 (invited)

Bhaumik Luncheon Young Scientists Seminar, Los Angeles, USA; May 2018 (invited)

Service and Public Engagement

Revealing the nature of dark matter with strong gravitational lensing; public Star Talk hosted by the Astronomy and Space Exploration Society at the University of Toronto (2021) (video)

Warm dark matter chills out; Dark matter halos smaller than previously known; press briefing at AAS 235 (2020) (video)

Referee for Monthly Notices of the Royal Astronomical Society, Astronomy & Astrophysics

Student Mentoring

Shibo Yu (University of Toronto) AST425 research project - tidal stripping of CDM subhalos

Erik Gillis (University of Toronto) SURP program, co-supervised with Jeremy Webb and Jo Bovy - N-body simulations of CDM structure in early-type galaxies

Hao Yang Yu (University of Toronto) AST425 research project - detecting core-collapsed halos in galaxy-galaxy strong lenses

Veronica Dike (UCLA) PhD thesis, co-supervised with Prof. Tommaso Treu - strong lensing constraints on primordial black holes

Alex Laroche (McGill, now PhD student at UofT) SURP program, co-supervised with Prof. Jo Bovy - strong lensing constraints on ultra-light dark matter

Alejandro Mendoza - Lamat Undergraduate Research Program, co-supervised with Prof. Anna Nierenberg (UC Merced)

Teaching

Teaching Assistant; University of California, Los Angeles
- Physics 1A (Physics for Scientists and Engineers: Mechanics)
- Physics 6A (Physics for Life Science Majors)
- Astronomy 6 (Changing concepts of the Universe)
- Physics 12 (Physics of Renewable Energy)

Teaching Assistant; James Madison University
- Physics 140 (College Physics I)
- Physics 150 (College Physics II)

Open-source Software

`pyHalo` (lead developer) : A python package for generating realizations of dark matter halos in cold, warm, self-interacting, and fuzzy dark matter for strong gravitational lensing simulations
`lenstronomy` (co-administrator) : A python package for gravitational lensing simulations
`quadmodel` (lead developer): A wrapper around lenstronomy and pyHalo for analyses of qudruply-imaged quasars

Languages

Fluent in both English (native language) and Spanish (advanced)
Python (advanced)
MATLAB (basic)
C++ (basic)
