

# Jiaqing Bi - Postdoc at ASIAA & DADDAA

## Planet formation in protoplanetary disks

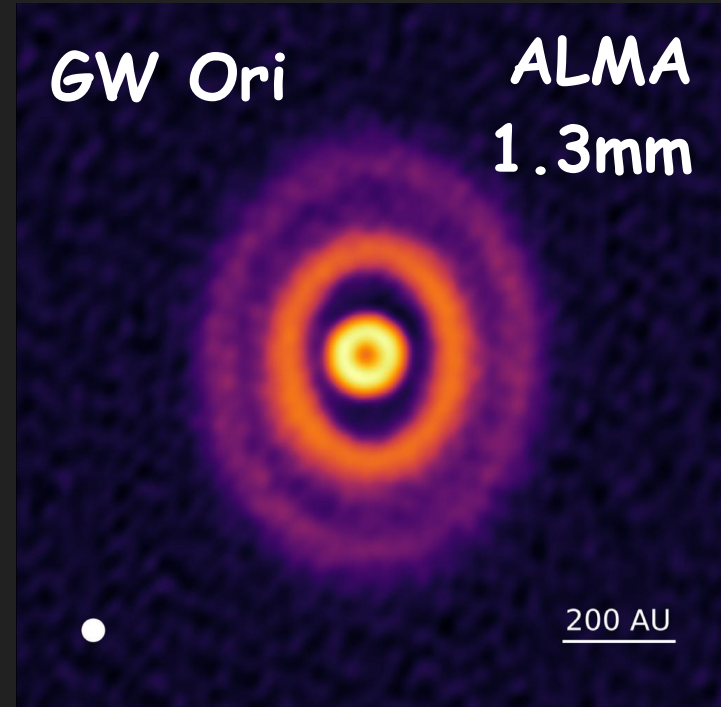

- dust dynamics
- planet-disk interactions
- radiative transfer

## Most of the time, numerical simulations

- 3D multi-species hydro
- GPU code on RT + dust dynamics

## But sometimes, observations as well

- ALMA dust continuum analysis

Misaligned Planet-Forming Rings around Triple Young Stars (Bi et al., 2020)
