

Mark Dodici

Ph.D. student, UofT Astro

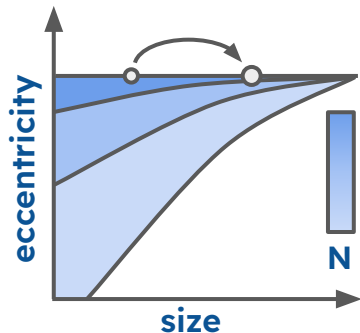

Advised by Yanqin Wu & Scott Tremaine

E: mark.dodici@astro.utoronto.ca

A Few Past Projects

Effects of collisions on high- e asteroid belt

→ New (?) cold Kuiper belt formation path

Misaligning a young star and its disk with a binary companion

→ distribution of ICs for misalignments

Forming binaries through gas *and* stellar friction

→ better rates of binary capture in range of environments

General Interests

- How things move in space
- Planetary systems, generally
- Outreach and education
- Sports
- Coffee
- Trains!

(can you tell I need to pick a thesis topic?)
